

Programming Massively Parallel Hardware

Assignment 3

Viktor Hansen

Task 1 - Matrix Transposition

Due to data loss (Makefile deleting `.cu/.cu.h` files while invoking `make clean`), I have only managed to solve tasks 1a, 1b and 1c. I still need to make tests and benchmarks for the implemented functions. The solutions are implemented in the `code/task1` directory. To compile, invoke `make` from the `code/task1` directory.
